

HOARDTEK

➤ Hoardtek is the industry-leader in PVC Hoarding

Founded in 2012, we have installed and managed over 900 hoarding projects.

Unlike many hoarding systems available on the market, our reusable and sustainable systems maintain a polished appearance throughout the project's duration when compared to materials such as timber. Our team understands that every project is unique, tailoring our solutions to meet your specific needs. We pride ourselves on being

responsive, reliable, and customer-centric while offering high levels of continuity. Our experienced professionals are always ready to assist you, answer your questions, and ensure your project runs smoothly. From the initial consultation to the final installation, we offer a seamless, hassle-free experience that consistently exceeds expectations.

Brochure printed on recycled materials.
100% recyclable.

Hoardtek offer truly **bespoke hoardings** tailored to the unique wind of the location of your site. With our in-house teams and transport locations throughout the UK, the service we provide is second to none.

➤ About us

HOARDTEK

“

We prioritise re-use as the best form of recycling. Our team of full-time Product Maintenance personnel ensures that products are cleaned and reconditioned to grade A stock.

Temporary works

We are able to meet all design briefs for freestanding hoarding. Our design is shared at quotation stage and completely free of charge.

Hire only

Our service encompasses the entire hoarding lifecycle, including installation, dismantle and removal. We do not sell hoarding, ensuring that we are with you throughout the project. Our pricing structure ensures that at all stages through projects from 1 to 250 weeks you are better off hiring than purchasing.

In-house teams

Our dedicated staff are exclusively trained in our hoarding system. It is the only product we offer so you are always getting the highest level of workmanship.

Huge stock holding

Our business model for hire only has been consistent over the years. Therefore, we have a huge stock holding. We can fix prices for 12 months with ease, and have full control over all aspects of the material supply.

Graphics

Rather than having to get a second supplier for graphics, we can handle all in house. We sub-contract the works out without mark-up ensuring you get the best service at the best price.

Colour options

Our standard White hoardings always look great, however if you prefer branded colours, painted options are available free of charge.

Fully recycled

Our product is fully recycled at the end of its life span. We work closely with our recycling partner ensuring that all components go into the recycling process, including our painted panels.

Re-use>recycle

We have full time Product Maintenance Operatives restoring pre-used materials back to Grade A for re-use.

Bespoke fabrications

Our in house fabrication team can accommodate specific gate requirements to suit your needs.

In-house HGV Fleet

We operate 2x 32T Hiab and 1x 32T Moffett Vehicles. These vehicles are dedicated to the hoarding department.

National service

We service the whole of Great Britain and Northern Ireland, our head office is in Leeds. To increase service and logistical efficiency we have satellite depots in Fair Oak, Southampton and Bathgate, Scotland.

“

Our in-house fabrication team can accommodate specific gate requirements, subject to additional costs and lead times.

➤ The design process

- Our hoardings are designed to BS EN 1991-1-4 to a FOS of 1.50 on overturning. However, we are happy to meet the design requirements of individual organisations where that is preferable to you.
- The design phase represents the initial step in our tender process. To initiate this process, we kindly request the following information:
 - location details
 - a site layout drawing
 - intended hire period
- Upon receiving this information, we will provide you with a fully personalised quotation and a temporary works design that addresses the hoarding's layout, gate placement, and wind load considerations. Subsequently, a site visit will be conducted to confirm these design specifics.
- We also have options for 0.74 kN notional loaded hoardings (TWfLC2) and 1.5kN and 3.0kN Crowd Loaded hoardings. As well as bespoke scaffold based solutions.

➤ The order process

- Submit your requirements for design and quotation.
- Initial design and quotation submitted to you.
- Site visit completed.
- Second design and quotation submitted – should this be necessary.

Our track record speaks for itself, and we are proud to be the top choice for PVC hoarding services in the industry.

Hoardtek provides eco-friendly, reusable hoarding to ensure your next project is as clean as possible. Having been established since 2012, all of our stock rolls over, meaning we can reuse our concrete blocks, making them more eco-friendly than even the most sustainable new concrete.

Our reusable PVC hoarding offers a multitude of benefits that extend beyond the construction site. From start to finish, you will only ever deal with our in-house team, who will be with you every step of the way.
